PURE MYCORRHIZAL INOCULUM

Mykos is a NATURAL AND ORGANIC species of beneficial soil fungi that creates a "sponge-like" mass which collects and stores nutrients and water, increasing the uptake of both. This single species mycorrhizae contains only *Rhizophagus intraradices*. Mykos does not contain any other microbes such as trichoderma or ecto mycorrhizae (which has no known direct effect on any vegetables, fruits, flowers or herbs).

GREAT FOR CONTAINERS, RAISED BEDS, AND ROW CROPS

- More efficient use of water and nutrients
- Helps plants resist drought
- Reduces transplant shock
- More vigorous plant growth
- Can increase yield
- Will not burn when used as directed
- Recommended for use with **Smart Pot**

CONTAINS NON-PLANT FOOD INGREDIENT(S):

Contains the following species of vesicular arbuscular mycorrhizal fungi:
Rhizophagus intraradices 300 propagules / g

Like Mykos? Try Azos!
Helps grow even more roots.

Net Wt: 1 lbs / .454 Kg

Expiration: see date on seal

MYKOS APPLICATION:

Add to hole, directly around plant roots. Mykos must come in contact with the roots. Set plant and backfill. Remember to water.

CONTAINERS:

1 - 3 gal container: 1 - 2 tbsp
5 - 7 gal container: 4 - 6 tbsp
10 - 20 gal container: 1/2 cup
25 - 50 gal container: 1 cup
100 gal container: 2 cups

ROCK WOOL CUBES:

1. Using a small stake or fork, poke several 1/4 - 1/2" holes in the bottom of the plant hole.
2. Add 1 - 2 tsp to hole, directly under plant roots.
3. Set plant and remember to water.

IN GROUND & RAISED BED:

1-2 tbsp per plant around each plant hole or directly to roots.

SOWING SEED:

1 tbsp per foot
1/2 tsp per cell/plug

FOR XTREME RESULTS:

Water with Azos & Xtreme Tea. Double application rates and mix into top 6" of soil surrounding plant hole.

CAUTION: Large Roots Are Expected!
