GROW YOUR OWN
TOP-SHELF CANNABIS

Growing heavy yields of high-potency cannabis can take years to master. And there's so much conflicting information out there, getting your plants to consistently produce high-quality bud can seem a near impossible feat.

But it doesn't need to be this way.

You can take all the guesswork out of your next grow right now... Simply by feeding your plants the right nutrients.

To put it simply, we understand cannabis. And how to get the most out of your next grow.

And the best way to do that is with the Advanced Nutrients Starter Kit, which features seven premium products that have helped growers achieve award-winning harvests around the world.

WHAT'S INSIDE?

BASE NUTRIENTS

SENSI GROW: A&B
Feed your plants the exact nutrients they need for a robust grow cycle. With our two-part pH Perfect® Sensi Grow base nutrients, you can rest assured that you've primed your plants for a profitable bloom phase. And that's not all: Our pH Perfect® Technology works around the clock to automatically adjust the pH for you so you never have to use meters or add harsh pH-adjusting chemicals ever again.

SENSI BLOOM: A&B
Bloom phase is the payoff phase, but your garden will only deliver its most potent yields when provided with the proper nutrition. That's where pH Perfect® Sensi Bloom comes in – this two-part base nutrients formula provides comprehensive nutrition for a bountiful bloom phase. Easy to use and backed by our 100% money back grower guarantee, this award-winning formula has been supporting top growers who are looking to raise their bud weights for more than two decades. But wait... that's not all you will enjoy when you incorporate Sensi Bloom Part A & B into your feed program. Growers across the globe are benefitting from our proprietary pH Perfect® technology, which means you can stop suffering with those dreadful pH pens altogether.

BUD TASTE & TERPENE ENHANCEMENT

BUD CANDY
Sweeter buds are more valuable buds. Achieve the ultimate bloom phase when you feed your plants Bud Candy, the industry's leading horticultural carbohydrates formula. Specially designed for use with all hydroponic growing media, Bud Candy has been formulated with the essential plant nutrient magnesium to bolster the formula's effectiveness.

BIGGER BUDS

BIG BUD
Big Bud is the legendary bloom booster that provides customized ratios of phosphorus and potassium for plants in bloom phase. Thousands of growers across the globe have relied on Big Bud as an essential component to their grow room regimen.

OVERDRIVE®
Overdrive® is a late-season bloom booster engineered for the last quarter of bloom phase. This popular Advanced Nutrients additive is carefully crafted to help plants as they approach the end of their life cycle. When other growers' plants are slowing down, Overdrive® continues to provide nutrients that enable your plants to pack on weight.

ROOT MASS EXPANDERS

VOODOO JUICE
We can't emphasize enough the importance of your plants' root structures. Hundreds of university studies have been conducted that all prove the same thing: bigger roots equals bigger yields. They transfer moisture, oxygen and nutrients into your crops, so the stronger the roots, the better your plants will grow. Provide your plants with the microbes that our team of Ph.D scientists have hand selected to promote the holistic vegetation of your harvest.

BUD POTENCY & STALK STRENGTHENER

B-52
People take B vitamins when they need a quick energy boost; similarly, professional growers give their plants B vitamins through both the grow cycle and bloom cycle. B-52 contains vitamin B1 and other ingredients that allow the plant to focus its energy on bud production.

ALSO INCLUDED...

- Recipe Chart
 - Measuring Cups
 - Gloves
- Trichome Magnifier
 - Droppers
 - Sticker Pack

GROW YOUR OWN
TOP-SHELF RECIPE

GROW CYCLE

		WEEK ONE	WEEK TWO	WEEK THREE	WEEK FOUR
	SENSI GROW A	4ML	8ML	16ML	16ML
	SENSI GROW B	4ML	8ML	16ML	16ML
	VOODOO JUICE	8ML	8ML		
	B-52	8ML	8ML	8ML	8ML

BLOOM CYCLE

		WEEK ONE	WEEK TWO	WEEK THREE	WEEK FOUR	WEEK FIVE	WEEK SIX	WEEK SEVEN
	SENSI BLOOM A	16ML	16ML	16ML	16ML	16ML	16ML	
	SENSI BLOOM B	16ML	16ML	16ML	16ML	16ML	16ML	
	VOODOO JUICE	8ML	8ML					
	BUD CANDY	8ML	8ML	8ML	8ML	8ML	8ML	
	BIG BUD		8ML	8ML	8ML			
	B-52			8ML	8ML	8ML	8ML	
	OVERDRIVE					8ML	8ML	
								NUTRIENT FREE FLUSH PERIOD

Repeat week 4 of either schedule if you want a longer vegetative period, or are cultivating a strain that requires more time to bloom.
*All measurements are shown in Milliliters per Gallon, 1ML per Liter = 4ML per Gallon, 1 US Gallon = 3.78 Liters
**For your convenience, per gallon amounts are measured to the nearest milliliter.
